Since 2025 due to the ongoing process of carve-outing tower infrastructure, the Company started to separate revenues from tower infrastructure in the mobile business revenue reporting, accordingly ARPU calculation for 2024 and 1Q2025 was adjusted and updated with minimal correction only for mobile business revenue.

- The Company continues to provide its customers with high-quality services, creates relevant offers, and maintains stable and effective communication with subscribers. We provide services to a stable subscriber base. We have not experienced significant changes in our mobile subscriber base over the last three years since the beginning of the war in Ukraine. We achieved positive dynamics of postpaid base due to the increase in number of IoT and private contracts for 2024 and this growth continued in 1Q2025 as well.
- ARPU growth by 15% in 1Q2025 vs 1Q202 is supported by increase in Voice & Data revenue, as a result of tariffs monetization activity and organic growth of data consumption.

Together we can
